MUSTANG PIPELINE N CONSTRUCTION, LLC

ABOUT US

Mustang pipeline was established in 2010 by owner and chief of operations Faron Taylor. Mustang's core business is the installation of new steel, poly, Fiberglass, Flex-Steel, Fiber-Spar, Zap lock used in both gas and oil pipelines. Mustang has completed pipelines for both Major and Independent producing operators (see operating client list). In addition to construction of new pipelines, Mustang also engaged in the removal of aboveground appurtenances (tank batteries, wellheads, pumpjacks and meter stations). In addition Mustang installs tank batteries, teardown of compressor stations and can provide roustabout services for oilfield related tasks. Mustang also engages in the Plugging of wellbores that no longer could sustain profitability. Mustang completed land restoration/remediation on all right-of-ways and well sites. In addition to Oil and Gas services, Mustang is now registered with FEMA to perform services for natural disaster clean up.

Due to the severe downturn in new pipeline construction, Mustang is shifting its focus to the plugging and remediation of abandoned pipelines and well sites. Mustang is uniquely positioned to accomplish this task. Mustang has qualified/experienced staff of a combination of Crane operators, Heavy equipment operators, ACL truck drivers, Laborers. Mustang is currently developing a partnership with a cement plugging entity. Mustang is also associated with a company that specializes in the removal and disposal of Norms (natural occurring radioactive material). Mustang has an impeccable safety record. Strong work ethic coupled with environmentally conscious employees.
